MAIL DATE 09/10/2008		DELIVERY MODE PAPER		

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/527,979

Applicant(s)

OSTERLANGER ET AL.

Examiner

MATTHEW JOHNSON

Art Unit

3682

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 June 2008.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 1-12 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☒ The drawing(s) filed on 14 March 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO-8508)
Paper No(s)/Mail Date _____

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
5) ☐ Notice of Informal Patent Application
6) ☐ Other: _____

DETAILED ACTION

Claim Objections

1. Claims 5 and 6 are objected to because of the following informalities:
 - Re clm 5: In line 3, the phrase "threat groove" should read -- thread groove --.
 - Re clm 6: The phrase, "wherein there is a clearance distance is provided between" should read -- wherein there is a clearance distance provided --
 - Re clm 9: It appears that claim 9 should depend from claim 8 instead of claim 6, so as to provide proper antecedent basis for the "hook" and "hook receptacle".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Brusasco (USP-5,005,436).

Re clm 1: Brusasco discloses a ball screw comprising:

- A spindle (2)
- A first thread groove (3) on the spindle

- A spindle nut (5) arranged on the spindle, a second thread groove (6) formed in the spindle nut, the first thread groove (3) and the second thread groove (6) being shaped and positioned to together form a thread path (8)
- Balls (7) arranged to roll in the thread path (C3 L12-18)
- A receptacle (10) in the spindle nut and opening to the spindle
- At least one deflecting piece (12) arranged in the receptacle of the spindle nut, the deflecting piece including a deflecting channel (9) shaped and directed for returning the balls (7) in the thread path from a run-out end and a run-in end (C3 L17) of at least one common turn of the thread path
- The deflecting piece (18) comprising a first partial deflecting piece (18; C3 L36-38; Fig. 3) and a second deflecting piece (18; C3 L36-38; Fig. 3) divided from the first partial deflecting piece by a parting plane (17), the first partial deflecting piece being formed integrally connected with the second partial deflecting piece (in the assembled state, the first and second piece are formed integrally connected via 20 and 21; see also C3 L44-48)

Re clm 2: Brusasco discloses the deflecting piece (12) comprising a base (15) and two spaced apart side plates (near numeral 18, Fig 3) attached to the base, one of the side plates being formed on the one partial deflecting piece and the other of the side plates being formed on the other partial deflecting piece, the base and the two spaced apart side plates bounding the deflecting channel (9).

Re clm 3: Brusasco discloses the two partial deflecting pieces (18) are captively connected to one another (via force fit of 20 and 21).

Re clm 4: Brusasco discloses the two partial deflecting pieces (18) are formed point-symmetrically in a sectional plane arranged transversely to the parting plane, with respect to a point of symmetry lying in the parting plane (Fig. 5).

Re clm 5: Brusasco discloses each of the side plates comprising a blade (24, 25) configured to engage between at least one of the balls (7) and the first thread groove (3) of the spindle (2), the blade positioned at a free end of the side plate and face the thread groove of the spindle (Fig. 3).

Re clm 6: Brusasco discloses there is a clearance distance between two free ends (between 24 and 25) of the side plates that is less than the ball diameter (Fig. 12).

Re clm 7: Brusasco discloses the deflecting piece (12) comprises ball guiding surfaces (26, 28) configured to lift the balls (7) off the first thread groove (3) of the spindle (C3 L53-62).

Re clm 10: Brusasco discloses that it is known in the art to form the deflecting pieces of thermoplastic material (C1 L52-53). The examiner notes that the phrase "and is produced by an injection-molded process" is a product-by-process limitation. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production (see MPEP 2113).

Re clm 12: Brusasco discloses the first partial deflecting piece (18) and the second partial deflecting piece (18) are shaped such that the parting plane (17) divides

the deflecting channel along a lengthwise direction of the first partial deflecting piece and the second partial deflecting piece (Figs. 3 and 5).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brusasco (USP-5,005,436) in view of Greubel (USP-6,425,302).

Re clms 8 and 9: While Brusasco does indeed disclose each of the partial deflecting pieces (18) include a pin (20) at one circumferential end and a pin receptacle (21) provided at an opposite, other circumferential end that grip one another (Fig. 6), Brusasco does not disclose a hook and hook receptacle.

Greubel teaches two partial deflecting pieces (52, 54) connected by a hook (66) and a hook receptacle (62) for the purpose of providing a more secure locking arrangement between the partial deflecting pieces.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified the device of Brusasco to have a hook that hooks into a hook receptacle, as taught by Greubel, for the purpose of providing a more secure locking arrangement between the partial deflecting pieces.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brusasco (USP-5,005,436) in view of Konz (USP-6,437,678).

Re clm 11: Brusasco does not disclose the two partial deflecting pieces are connected by a film hinge.

Konz teaches two plastic injection molded pieces (16 and 17) connected by a film hinge (24) for the purpose of keeping the parts properly oriented and aligned thus facilitating assembly (C6 L26-28).

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified the device of Brusasco such that the partial deflecting pieces are connected by a film hinge, as taught by Konz, for the purpose of keeping the parts properly oriented and aligned thus facilitating assembly (C6 L26-28).

Response to Arguments

7. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MATTHEW JOHNSON whose telephone number is (571)272-7944. The examiner can normally be reached on Monday - Friday 8:30a.m. - 5:00p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on 571-272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
